Health and Safety at Work

'Safety Signs'

Learning aims

You should be able to:

- name the ***four*** different types of safety signs and their meaning
- explain how and where to use the signs to keep workers safe

Starter

…Signs as a *communication* medium in everyday life

- What are they for? What do they tell us? Why are they important?
- How observant are you in everyday life?
- Which signs can you remember seeing today?
- Why do we use signs?

The Health and Safety (Safety Signs and Signals) Regulations 1996

- These regulations require employers to provide safety signs in a variety of situations that do, or may, affect health and safety.
- There are four types of safety signs in general use. Each type has a designated shape and colour to make sure that we all get health and safety information in a simple, bold and standard way, with little use of words.

Activity

- Go through and explain the ***QIA Safety Sign*** power point presentation.

Activity
Stage 1

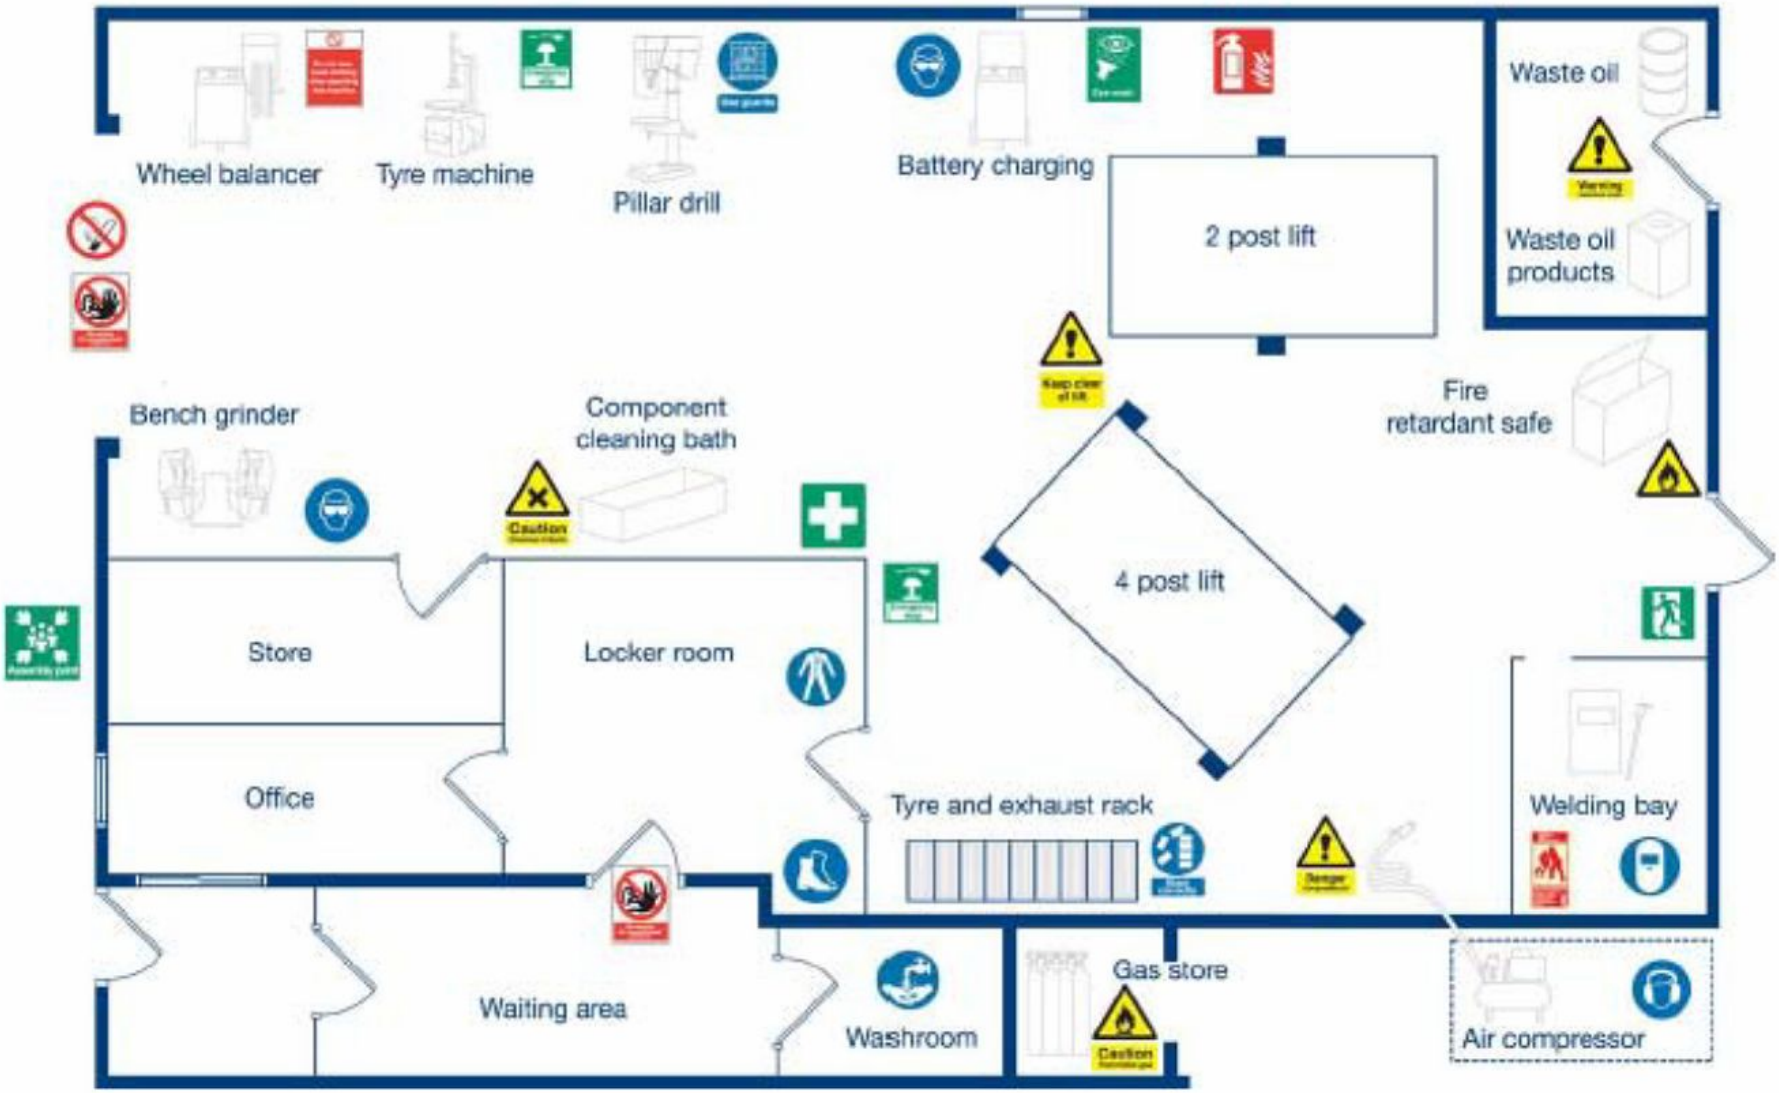

Look at the signs on pages 4.45 and 4.46 - activity sheets. Find out where they are used; write the type and meaning under each sign.

Stage 2

- Working in small groups of ***four/five***. Use the Safety Sign board and symbol cards.

Look at the ***plan*** of the light vehicle workshop on the board and the ***signs*** that you have to place.
Discuss and agree what the signs mean. *Try to do this without referring to the last page of your handout!*
Then decide where to place the safety signs in the best positions on the workshop floor plan. You will need to apply both your expertise and common sense to make careful judgements.
Be prepared to explain your decisions to the rest of the class.

Solution

Wheel balancer
Tyre machine
Pillar drill
Battery charging
2 post lift
Waste oil
Waste oil products
Bench grinder
Component cleaning bath
Caution
Fire retardant safe
4 post lift
Store
Locker room
Office
Tyre and exhaust rack
Welding bay
Waiting area
Washroom
Gas store
Caution
Air compressor

Alternative Activity

Working in pairs.

- Look at the safety signs around the department
- Using your phones camera – take photos of the machine and the corresponding safety sign(s)
- Find a minimum of three different safety signs
- Produce an A4 fact sheet – answer the following questions

Alternative Activity

Working in pairs.

- *Look at the safety signs around the department*
- *Using your phones camera – take photos of the machine and the corresponding safety sign(s)*
- *Find a minimum of three different safety signs*
- *Produce an A4 fact sheet and hand this in at the end of the lesson*

Alternative Activity

Produce an A4 fact sheet – answer the following questions….

- *What is the machine/process/feature (emergency exit)?*
- *What **‘type’** of safety sign(s) has been used?*
- *What safety sign(s) has been used?*
- *What information is this safety sign(s) showing?*
