Textiles Questions

Figure 1 shows a fabric canopy for use in a garden. It is supported on aluminium legs and anchored with nylon cords.

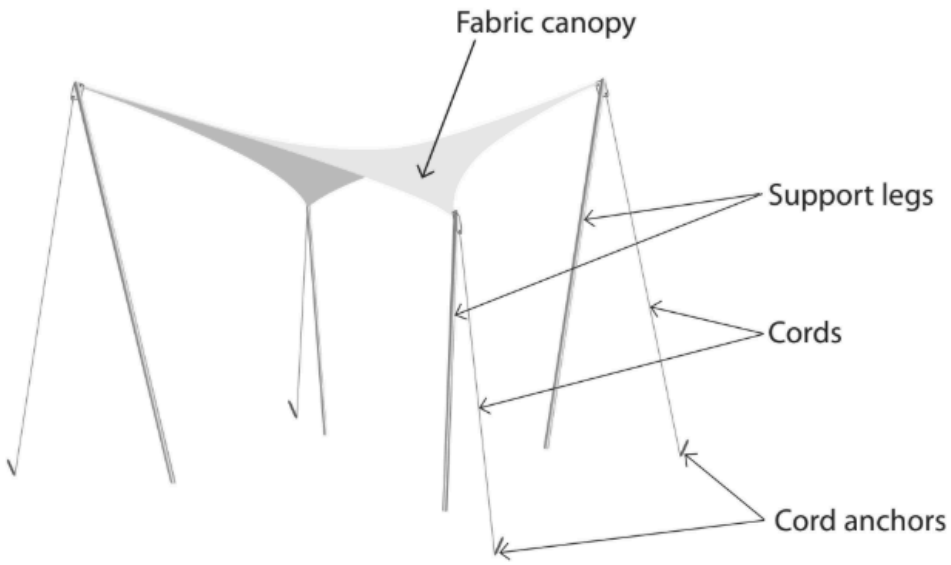

Figure 1

(a) The fabric canopy is made from polyester because it is lightweight, waterproof and durable.
Give two further characteristics of polyester fabric that make it a suitable material for the canopy. (2)
1

2

(b) The cords are made from nylon.
Explain two working properties of nylon that make it a suitable material for the cords. (4)
1

2

Sustainability is a key consideration in the manufacture of all consumer products including clothing.

(a) State two textile raw materials that can be considered as environmentally sustainable. (2)

1

2

A piece of furniture will be sold with separate padded cushions that have textile covers.

Name two natural fibre textiles that could be used for the cushion covers. (2)

1

2

The textile fabric is in rolls 500m long by 1.3m wide. Each cushion cover requires a single piece of fabric 0.45m by 0.85m.

Calculate the maximum number of cushion covers that can be manufactured from one roll. (3)

Answer .....

Figure 5 shows a bandsaw used by a manufacturer of consumer products.

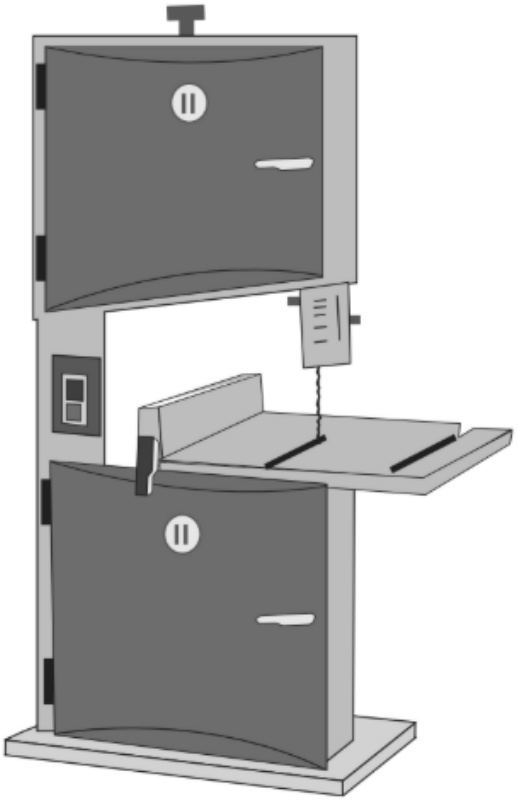

Figure 5
