Joining Materials

Here is a worksheet with questions on brazing, welding, soldering, riveting and threaded fastening. You can use the web search results to help you answer the questions.

1. What is the difference between welding and brazing in terms of the melting temperature of the base materials?
2. What are the advantages and disadvantages of welding compared to brazing and soldering?
3. What is the purpose of flux in soldering?
4. What are some common base materials and filler metals used in soldering?
5. What are some applications of soldering in the electronics and plumbing industries?
6. What are the main types of welding processes?
7. What are the benefits of TIG welding over other welding methods?
8. How can a TIG welder be used to braze metals?
9. What are some common UK standards for joining and surfacing metals?
10. What is a rivet and how is it used to join sheet metal?
11. What is a nut and bolt and how does it work as a fastening device?
12. What are the benefits and drawbacks of using nuts and bolts over other joining methods?.
